

TO-DO LIST APPLICATION [GitHub](#)

Project Type: A Python-based application developed to manage daily tasks efficiently.

Programming Language: Python

Internship: Python Developer Internship

Organization: Auspify Technologies

1. Description

The To-Do List Application is a Python console application that allows users to manage their daily tasks.

The application provides options to add tasks, display tasks, mark tasks as completed, and delete unwanted tasks. It also saves the task data to a file so that the information can be stored for future use.

2. Objective

The main objective of this project is to develop a simple task management application using Python.

The project aims to:

- Manage daily tasks efficiently.
- Add and display tasks.
- Mark tasks as completed.
- Delete unwanted tasks.

- Save task information to a file.
 - Practice Python file handling and data structures.
-

3. Features

- **Add Tasks** – Add new tasks to the list.
 - **View Tasks** – Display all available tasks.
 - **Mark Tasks as Completed** – Update the status of completed tasks.
 - **Delete Tasks** – Remove unwanted tasks.
 - **Save Task Data** – Store task information in a file.
 - **Task Status Management** – Keep track of completed and pending tasks.
-

4. Technologies Used

Technologies	Purpose
Python	Develop the application
Lists & Dictionaries	Store and manage risk information.
File Handling	Save and retrieve task data
CRUD Operation	Add, view, update and delete tasks.
Console	User interaction.

5. Python Concepts Used

- Lists
- Dictionaries

- Functions
 - Loops
 - Conditional statements
 - File handling
 - CRUD operations
-

6. How it Works

The application follows a simple task management process:

Step 1: User starts the application.

Step 2: The application displays the available task options.

Step 3: User selects an option.

Step 4: The user can add a new task.

Step 5: The user can view all tasks.

Step 6: The user can mark a task as completed.

Step 7: The user can delete an unwanted task.

Step 8: Task data is saved to a file.

7. How to Run

Follow these simple steps to run the To-Do List Application:

Step 1: Install Python on your computer.

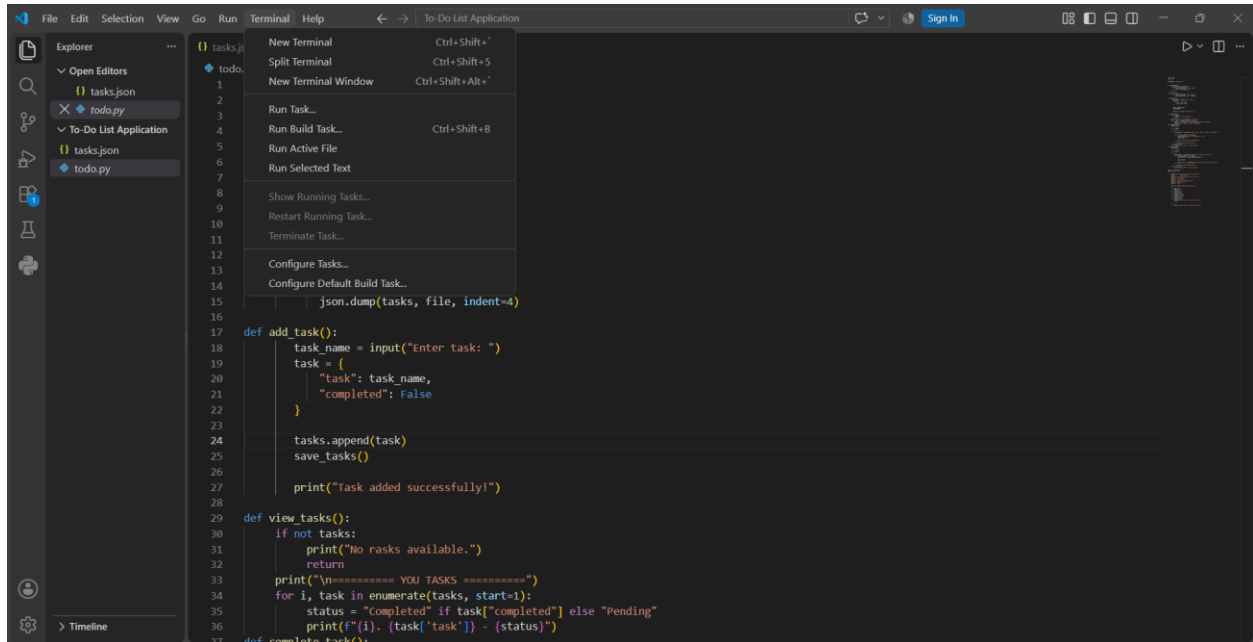

Step 2: Save the program as:

todo.py

Step 3: Keep the required task/data file in the project folder, if your program creates or uses one.

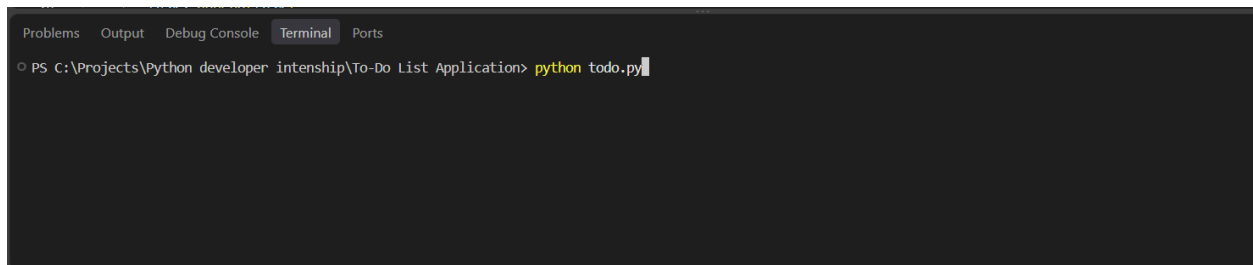

Step 4: Open the project folder.

Step 5: Open **Command Prompt / Terminal** -> New Terminal.

Step 6: Run the program:

python todo.py

Step 7: The To-Do List menu will appear.

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
          TO-DO LIST          ...
=====
2. View Tasks
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter your choice: 
```

Step 8: Select the required option, such as:

1. Add Task

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
          TO-DO LIST          ...
=====

Enter your choice: 1
Enter task: python project
Task added successfully!
```

2. View Tasks

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
          TO-DO LIST          ...
=====
2. View Tasks
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter your choice: 2
```

Python project task successfully added.

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
          TO-DO LIST          ...
=====
1. python project - Pending
7. python project - Pending
=====
          TO-DO LIST          ...
=====
```

3. Mark Task as Completed

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
TO-DO LIST
1. Add Task
2. Remove Task
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter your choice: 3
```

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
TO-DO LIST
1. Add Task
2. Remove Task
3. Mark Task as Completed
4. Delete Task
5. Exit
6. python project - Pending
7. python project - Pending

Enter task number to mark as completed: 7
Task marked as completed!
```

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
TO-DO LIST
1. Add Task
2. Remove Task
3. Mark Task as Completed
4. Delete Task
5. Exit
6. python project - Pending
7. python project - Completed

=====
TO-DO LIST
=====
```

4. Delete Task

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
TO-DO LIST
1. Add Task
2. Remove Task
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter your choice: 4
```

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
TO-DO LIST
1. Add Task
2. Remove Task
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter task number to delete: 7
Task 'python project' deleted successfully!

=====
```

5. Exit

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
          TO-DO LIST
=====
1. Add Task
2. View Tasks
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter your choice: 5
```

```
PS C:\Projects\Python developer intenship\To-Do List Application> python todo.py

=====
          TO-DO LIST
=====
1. Add Task
2. View Tasks
3. Mark Task as Completed
4. Delete Task
5. Exit

Enter your choice: 5
Thank You for using To-Do List!
PS C:\Projects\Python developer intenship\To-Do List Application>
```

Step 9: Select Exit when you have finished.
