

EXPENSE TRACKER SYSTEM [GitHub](#)

Project Type: A Python application used to record and analyze daily expenses.

Programming Language: Python

Internship: Python Developer Internship

Organization: Auspify Technologies

1. Description

The Expense Tracker System is a Python console application that helps users manage their daily expenses.

Users can enter the date, category, description, and amount of an expense. The application stores the records in a CSV file and provides spending summaries and monthly reports.

2. Objective

The main objectives are:

- To record daily expenses.
 - To categorize expenses.
 - To store expense data in a CSV file.
 - To calculate total spending.
 - To generate category-wise spending summaries.
 - To generate monthly expense reports.
-

3. Features

- Add Expense
- View Expenses

- Category Management
 - Spending Summary
 - Monthly Report
 - CSV Data Storage
 - Date Validation
 - Amount Validation
 - Simple Menu-Based Interface
-

4. Technologies Used

Technology	Purpose
Python	Application development
CSV	Store expense records
Datetime	Date validation and monthly reports
OS	Check and create the CVS file
Console	User interaction

5. How It Works

1. The application creates an expenses.csv file if it does not exist.
 2. The user selects an option from the menu.
 3. Expense details are entered and saved.
 4. All saved expenses can be viewed.
 5. The application calculates total and category-wise spending.
 6. The user can select a month and year to view a monthly report.
 7. The user can exit the application when finished
-

6. How to Run

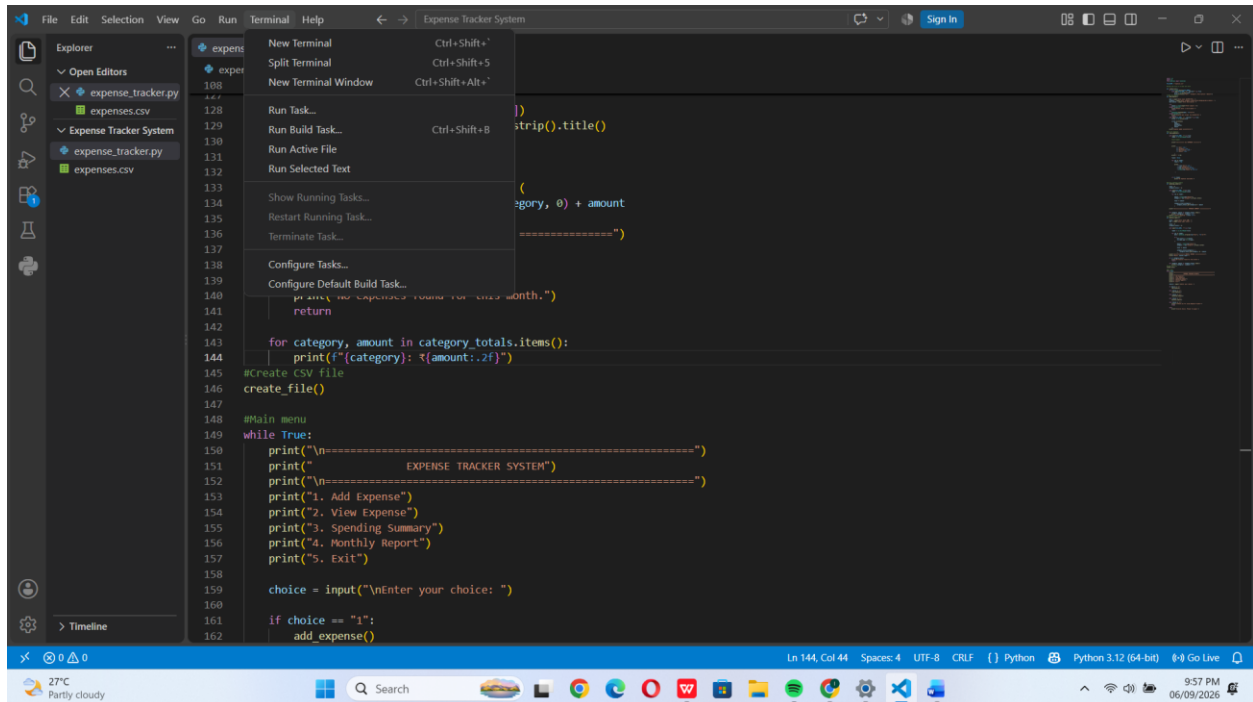

Step 1: Install Python on your computer.

Step 2: Save the code as:

expense_tracker.py

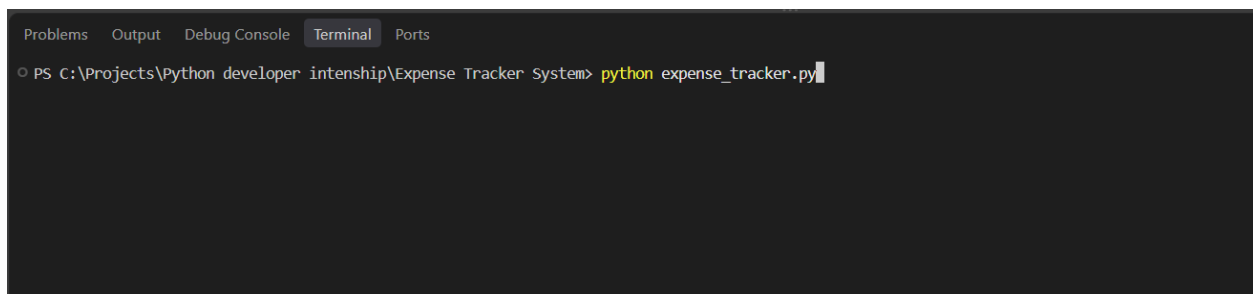

Step 3: Open the project folder.

Step 4: Open Command Prompt / Terminal -> New Terminal

Step 5: Run:

python expense_tracker.py

Step 6: The Expense Tracker menu will appear.

```
Problems Output Debug Console Terminal Ports
PS C:\Projects\Python developer intenship\Expense Tracker System> python expense_tracker.py

=====
1. Add Expense
2. View Expense
3. Spending Summary
4. Monthly Report
5. Exit
Enter your choice: █
```

Step 7: Select an option by entering its number.

1. Add Expense
2. View Expense
3. Spending Summary
4. Monthly Report
5. Exit

```
Problems Output Debug Console Terminal Ports
PS C:\Projects\Python developer intenship\Expense Tracker System> python expense_tracker.py

=====
1. Add Expense
2. View Expense
3. Spending Summary
4. Monthly Report
5. Exit
Enter your choice: 1
Enter date (DD-MM-YYYY): █
```

Step 8: Enter the required expense details.

1. Add Expense

```
Problems Output Debug Console Terminal Ports
PS C:\Projects\Python developer intenship\Expense Tracker System> python expense_tracker.py

=====
3. Spending Summary
4. Monthly Report
5. Exit

Enter your choice: 1
Enter date (DD-MM-YYYY): 01-05-2026
Enter category (Food/Travel/Shopping/Bills/Other): Food
Enter description: Lunch
Enter amount: ₹500█
```

```
Problems Output Debug Console Terminal Ports

PS C:\Projects\Python developer intenship\Expense Tracker System> python expense_tracker.py
> Exit

Enter your choice: 1
Enter date (DD-MM-YYYY): 01-05-2026
Enter category (Food/Travel/Shopping/Bills/Other): Food
Enter description: Lunch
Enter amount: ₹500
Expense added successfully!
```

Step 9: Use the menu to view expenses or generate reports.

2. View Expense

```
PS C:\Projects\Python developer intenship\Expense Tracker System> python expense_tracker.py

===== ALL EXPENSES =====
Date          Category   Description      Amount
-----
01-09-2026    food       Lunch            500.00
01-09-2026    food       dinner           800.00
02-09-2026    bill       light bill       2500.00
03-09-2026    travel     SBI bank         30.00
03-09-2026    food       biryani          1000.00
09-08-2026    food       lunch            500.00
09-08-2026    food       dinner           500.00
05-09-2026    Bill       medicines        696.00
02-03-2026    food       burger           100.00
03-03-2026    bill       tax              2000.00
01-05-2026    Food       Lunch            500.00
