

AI CHATBOT APPLICATION [GitHub](#)

Project Type: A Python-based chatbot that responds to user questions using predefined responses and basic NLP techniques.

Programming Language: Python

Internship: Python Developer Internship

Organization: Auspify Technologies

1. Description

The AI Chatbot Application is a simple Python console application that allows users to interact with a chatbot through text.

The chatbot recognizes common keywords and provides suitable responses to greetings, Python questions, AI questions, general questions, and help requests.

2. Objective

The main objectives are:

- To create an interactive chatbot using Python.
- To process user input.
- To provide suitable responses.
- To implement basic Natural Language Processing (NLP).
- To use Object-Oriented Programming.

- To handle exit commands.

3. Features

- Interactive Chat
- Greeting Responses
- Python-Related Responses
- AI-Related Responses
- Multiple Responses
- Case-Insensitive Input
- Keyword-Based Response
- Unknown Query Handling
- Exit Commands

Exit commands include:

bye

stop

exit

quit

4. Technologies Used

Technology	Purpose
------------	---------

Python	Application development
OOP	Create and manage the chatbot class
Random Module	Select different responses
String Processing	Process user input
Console	User interaction

5. How It Works

1. The chatbot starts with a welcome message.
 2. The user enters a message.
 3. The input is converted to lowercase and cleaned.
 4. The chatbot checks for matching keywords.
 5. A suitable response is selected.
 6. The response is displayed.
 7. The conversation continues until the user enters an exit command.
-

6. How to Run

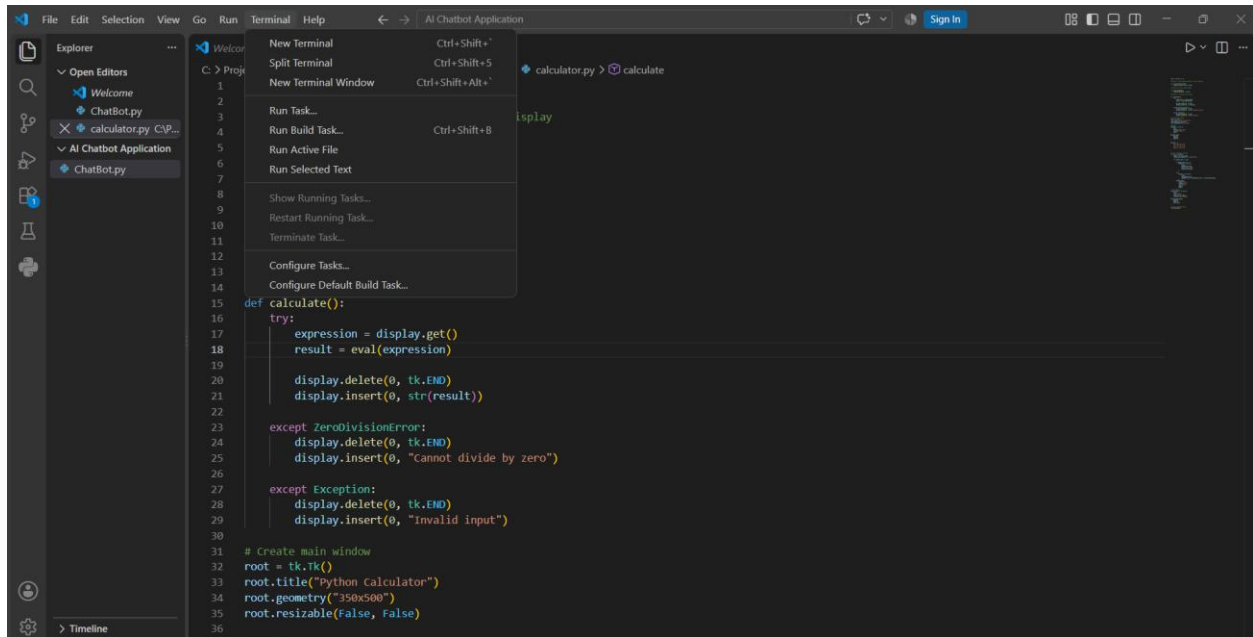

Step 1: Install Python.

Step 2: Save the code as:

chatbot.py

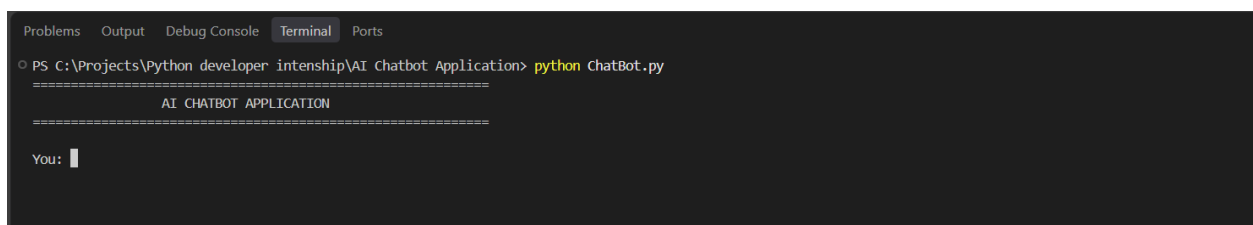

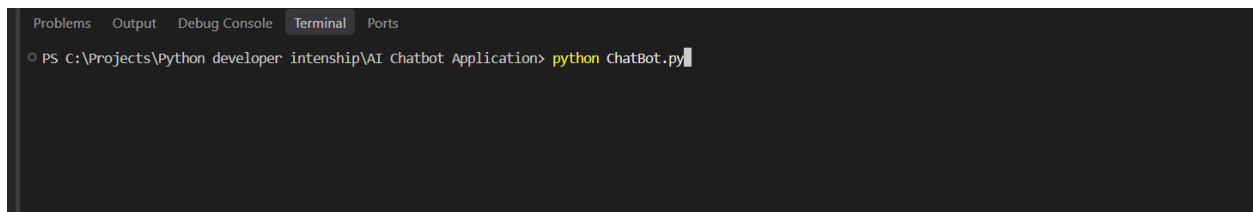

Step 3: Open the project folder.

Step 4: Open Command Prompt / Terminal -> New Terminal

Step 5: Run:

python chatbot.py

Step 6: Enter a message.

```
PS C:\Projects\Python developer intenship\AI Chatbot Application> python ChatBot.py
=====
AI CHATBOT APPLICATION
=====

You: Hii
Bot: Hello! Nice to meet you.

You: good evening
Bot: Good evening! Nice to chat with you.

You: how are you
Bot: I'm fine and ready to help you.

You: what is your name
Bot: You can call me Python ChatBot.

You: what can you do
Bot: I can answer basic questions and have a simple conversation with you.

You: how can i learn python
Bot: Start with Python basics, then learn functions, OOP, file handling, and libraries.

You: what is ai
Bot: Artificial Intelligence allows computers to perform tasks that normally require human intelligence.

You: what is chatbot
Bot: A chatbot is a computer program that communicates with users through conversation.

You: thanks
Bot: Anytime!

You: 
```

Step 7: Continue the conversation.

Step 8: Enter bye, stop, exit, or quit to close the application.

```
Problems Output Debug Console Terminal Ports
PS C:\Projects\Python developer intenship\AI Chatbot Application> python ChatBot.py
You: thanks
Bot: Anytime!

You: bye
Bot: Goodbye! Have a great day!
PS C:\Projects\Python developer intenship\AI Chatbot Application> 
```

Result: The chatbot successfully interacts with users and provides appropriate responses using basic NLP and Python programming concepts.
